

Pushkar Jat

7734003328 | dev.pushkarjat@gmail.com | Pune

Summary

Senior AI Engineer and Full Stack Developer with 5+ years of experience building production-grade enterprise applications, with a strong focus on Generative AI, Large Language Models, Agentic AI, and cloud-native platforms. Experienced in designing AI assistants, multi-agent workflows, RAG systems, semantic search, vector retrieval, tool calling, prompt/context engineering, and enterprise AI integrations. Strong full-stack expertise across Node.js, TypeScript, React, REST APIs, Azure, Google Vertex AI, Redis, RabbitMQ, SQL/NoSQL databases, Docker, and CI/CD. Experienced in modernizing legacy conversational systems and delivering scalable AI solutions for enterprise customers.

Skills

GenAI: LLMs, OpenAI, Azure AI, Agentic AI: Agents, Multi-Agent Systems, Tool Calling, Prompting: Prompt Engineering, Context Engineering
RAG: Embeddings, Vector Search, Semantic Search, AI: LangChain, AI Orchestration, AI Evaluation
Knowledge Graphs: Knowledge Graph Implementation, Ontology Design, RDF / OWL, Semantic Modeling Frameworks
Graph Querying: SPARQL, Cypher, Neo4j, Stardog, Validation: SHACL, Governance: Ownership, Versioning, Data Quality, Lineage, Access Control, Standards, Lifecycle Management
Languages: Python, TypeScript, JavaScript, Frontend: React.js, React Native, Redux
Backend: Node.js, NestJS, Express.js, APIs: REST APIs, Microservices, API Integration
Databases: SQL, PostgreSQL, MongoDB, Cosmos DB, Cloud: Azure, Google Cloud, Azure Functions
Messaging: Redis, RabbitMQ, Kafka, Conversational AI: Teams Bots, Bot Framework

Experience

Tech Mahindra | Pune

Senior Software Engineer | 06/2024 - Present

Project: TalkTalk – Enterprise Conversational AI Modernization

- Architect and develop enterprise-grade Generative AI and Agentic AI solutions using LLMs, Google Vertex AI, LangChain, and cloud-native services.
- Design intelligent AI agents capable of reasoning, tool invocation, enterprise knowledge retrieval, and workflow automation.
- Build production-grade RAG and retrieval systems using semantic search, vector databases, hybrid retrieval, and enterprise knowledge sources.
- Engineer AI orchestration pipelines covering prompt management, context engineering, memory, evaluation, and observability.
- Develop scalable backend services using Node.js, TypeScript, REST APIs, Redis, messaging systems, and distributed architectures.
- Modernize legacy conversational applications into intelligent AI assistants, improving automation and customer experience.
- Build reusable AI frameworks, integrations, and deployment pipelines to accelerate enterprise AI delivery.
- Work with Google Vertex AI, LivePerson, Yellow.ai, LangChain, enterprise APIs, and cloud infrastructure.

Celebal Technologies | Jaipur

Team Lead – GenAI Full Stack Developer | 09/2022 - 03/2024

Project: CapitaLand – Ascott AI Chatbot

- Led end-to-end development of an enterprise AI-powered customer support chatbot.
- Integrated OpenAI GPT-3, GPT-3.5 and GPT-4 for advanced conversational and NLP capabilities.
- Implemented LangChain, tool-based interactions, agent workflows, document Q&A, embeddings, and vector-based retrieval.
- Architected backend services using Node.js, TypeScript, Azure, Redis, RabbitMQ, and multiple databases.
- Developed APIs, integrations, real-time communication, and monitoring using Azure Application Insights.
- Led deployment pipelines and production optimization using Azure DevOps.

Celebal Technologies | Jaipur

Team Lead – GenAI Full Stack Developer | 09/2022 - 03/2024

Project: Syngene – Microsoft Teams Bot + Web Application

- Led full-stack development of a Microsoft Teams chatbot and integrated web application.
- Developed frontend and backend using React, Node.js and REST APIs.

- Managed CI/CD, Git-based development, Azure deployment, and Microsoft Teams integration.
- Worked directly on requirement analysis, stakeholder communication, and delivery.

Celebal Technologies | Jaipur

Associate – Full Stack Developer | 01/2021 - 09/2022

- Developed Microsoft Teams chatbot solutions using React, Node.js, Microsoft Bot Framework and Azure.
- Worked across frontend, backend, API integration, authentication, deployment and maintenance.
- Developed real-time dashboard applications using WebSockets and RabbitMQ/Kafka-based messaging.
- Managed Git-based development and CI/CD deployment workflows.

Education

Rajasthan Technical University, Kota | Jaipur
Bachelor of Technology – Computer Engineering | 05/2021

Certificates

Conversational AI Professional, Systems Engineering LivePerson
